Subject:
Presentation on findings from the second and final round of Futures Planning, including recommendations of Horizon strategies resilient to future uncertainty which should be advanced into Plan Bay Area 2050.

Background:
In early 2018, MTC/ABAG launched the Horizon initiative, focused on preparing the Bay Area for an uncertain future. Through four main work elements – Public Engagement, Perspective Papers, Project Performance, and Futures Planning – Horizon sought to identify transformative solutions to make the Bay Area more resilient and equitable in the coming decades. Each element was crafted to help build a stronger foundation for the next-generation regional plan, Plan Bay Area 2050.

Over the past 18 months, the Futures Planning process has advanced from identifying Futures to testing strategies to study in each of the them. Along the way, staff explored how Plan Bay Area 2040 strategies performed under a wide range of divergent external forces. In short, many of the prior Plan’s strategies struggled to perform when exposed to a greater variety of political, technological, economic and environmental challenges that could impact the lives of Bay Area residents. These were discussed in detail in the Futures Interim Report – Opportunities and Challenges (published March 2019).

Most recently, staff held public workshops and stakeholder meetings in spring 2019 to identify a set of roughly 30 strategies to study in the second round of Futures Planning. These strategies were designed to be both resilient and equitable, targeting the specific challenges laid out in the Futures Interim Report. Over summer 2019, staff have been conducting extensive quantitative and qualitative analysis of the strategies, simulating their impacts to provide an informed recommendation about which should be considered for inclusion in Plan Bay Area 2050.

Issues:
In advance of the Futures Final Report publication later this month, staff is providing a summary of preliminary findings from the Futures Round 2 analysis. These findings are high-level, focusing on the “top 10” key takeaways from our work so far; the report will delve into the specifics in greater detail, serving as an initial staff recommendation for the Draft Blueprint phase of Plan Bay Area 2050.
As detailed in Attachment A, our work to date has generated ten high-level findings based on the strategies studied in Futures Round 2:

1. New growth areas enable more growth near transit and near opportunity.
2. A mix of strategies to retain and expand affordable housing made progress in addressing the current affordable housing gap.
3. Shifts in transportation mode choice were most pronounced for active transportation, driven in part by micromobility strategies.
4. While still present, transit overcrowding was partially alleviated, with new bus rapid transit (BRT) lines as well as a new Transbay Rail Crossing playing a key role.
5. Road pricing reduced roadway congestion, but equity concerns need to be addressed before advancing this strategy further.
6. Economic development strategies evaluated were insufficient to slow the decline of the middle class.
7. Adaptation and retrofit strategies boosted our region’s resilience.
8. Urban growth boundaries led to minimal greenfield development in both Round 1 and Round 2.
9. A VMT-based fee on office development was effective in focusing office growth, but not in shifting jobs to the East and North Bay.
10. A large tax package focused on higher-income individuals and businesses, contemplated to underwrite the cost of strategy projects and subsidies, did not have significant adverse impacts on the economy.

In addition to high-level findings, the final report will provide a breakdown of findings for each individual strategy, focusing on its resilience to a range of uncertain future conditions as well as its implications for social equity.

The Futures Planning work – in particular, the Futures Final Report – will serve as a helpful foundation for staff, committees, and board members as key Plan Bay Area 2050 decisions must be made over the coming months. Through the Blueprint planning process, the subset of Horizon strategies that proved resilient and equitable under a wide range of future conditions can be refined, improved on, and when needed, supplemented.

Starting this month, staff will hold “pop-up” workshops across the region, highlighting the most effective strategies from the Futures Final Report; this will allow us to better understand which strategies resonate with the public. Staff will also host Plan Bay Area 2050 Blueprint half-day stakeholder workshops focused on the four topical areas of the plan: Transportation, Housing, the Environment, and the Economy. Feedback at these events will inform refinements to the strategies to study in the Blueprint phase.

Recommendation: None

WIN-WIN SOLUTIONS
Three Futures - “What If?” Scenarios

A. Rising Tides, Falling Fortunes
   What if... the federal government cuts spending and reduces regulations, leaving more policy decisions to states and regions?

B. Clean and Green
   What if... new technologies and a national carbon tax enabled greater telecommuting and distributed job centers?

C. Back to the Future
   What if... an economic boom and new transportation options spur a new wave of development?

Refresher: How Did We Integrate the Megaregion?

Status quo Future - interregional travel continues to grow at current rate, including in-commuting

Federal policy minimizes further growth in interregional travel, with new taxes making it much less affordable for mega-commuters

Low cost of driving allows the megaregion to blossom - with much more rapid interregional growth than today overwhelming existing regional gateways
Refresher: 35 Strategies Analyzed

Strategies were designed to support these nine priority areas, based on the Futures Interim Report findings. While new revenues were assumed in all Futures, fiscal constraint did mean that some strategies were omitted from Rising Tides, Falling Fortunes.

- Improve Economic Mobility
- Shift the Location of Jobs
- Spur Housing Production
- Retain & Expand Affordable Housing
- Improve Access, Speed, and Reliability of Transportation
- Prioritize Active Modes
- Price Transportation Services
- Reduce the Environment’s Impact on Us
- Reduce Our Impact on the Environment
Refresher: Five Challenges from Round 1 Analysis

In the Futures Interim Report (March 2019), a set of key challenges were identified. The challenges focused on how Plan Bay Area 2040 strategies might fare under previously-unstudied external forces like sea level rise, autonomous vehicles, and federal policy shifts.
Without new strategies in place, Bay Area housing affordability continued to get worse.
Public transit, walking, and bicycling saw limited gains in mode share compared to 2015 conditions.

**Rising Tides, Falling Fortunes**
In 2050, 67% of commuters use autos.

**Clean and Green**
In 2050, 45% of commuters use autos.

**Back to the Future**
In 2050, 69% of commuters use autos.

In 2015, 77% of commuters use an automobile to get to work.
A significant share of lower-income households remained at risk of displacement in each Future.
Unmitigated impacts from sea level rise and natural disasters resulted in significant damage across the region.

Rising Tides, Falling Fortunes
3 feet of sea level rise

Clean and Green
1 foot of sea level rise

Back to the Future
2 feet of sea level rise

Homes Affected by Hazards

- Permanent Inundation

Sea Level Rise

- 1k
- 10k
- 40k

Earthquake Damage & Recovery

- Recovered before 2040
- Recovered between 2040-2045
- Recovered between 2045-2050
- Recovered after 2050
Land use strategies included in *Plan Bay Area 2040* were insufficient to address the region’s longstanding jobs-housing imbalance.

**Overall Growth**
Circle area represents combined job & housing growth from 2015 to 2050.

- negative growth
  - 10k
  - 100k
  - 500k

**2050 Jobs/Housing Ratio**
Red areas are housing rich. Blue areas are job rich.

- **Rising Tides, Falling Fortunes**
  +0.5M Homes, +0.5M Jobs

- **Clean and Green**
  +1.3M Homes, +1.1M Jobs

- **Back to the Future**
  +2.1M Homes, +2.7M Jobs
Top 10: Horizon Strategy Findings

We have explored the effectiveness of over 30 strategies to improve the region’s economic, housing, transportation, and environmental challenges.
New growth areas enable more growth near transit and near opportunity.

Allow Diverse Housing Around Transit
Allow more diverse housing growth around areas with high frequency transit. Expand the growth footprint beyond the current list of PDAs.

Allow Diverse Housing in High-Resource Areas
Allow more diverse housing growth in areas of high opportunity that also have moderate transit service. Expand the growth footprint beyond the current list of PDAs.

Location of households added between 2015-2050 relative to growth geography

<table>

Rd. 1: Rising Tides, Falling Fortunes
Rd. 2: Clean & Green
Rd. 1: Back to the Future
Rd. 2: Back to the Future
A mix of strategies to retain and expand affordable housing made progress in addressing the current affordable housing gap.

**Pass Inclusionary Zoning Policies**

Require 10% to 20% of all new development to be deed-restricted affordable, expanding off the Plan Bay Area 2040 inclusionary strategy.

**Fund Affordable Housing**

Raise $1.5 billion in new annual revenue to build and preserve affordable housing, complementing existing federal, state, and local affordable housing funds.

**Number of deed restricted affordable housing units and the number of low-income households**

- **Low-income households**
- **Number of low-income households and deed restricted affordable housing units**
- **How affordable units are built**
  - N/A
  - New revenue (Rd 2)
  - Existing revenue
  - New inclusionary (Rd 2)
  - PBA inclusionary
  - Existing units
Shifts in transportation mode choice were most pronounced for active transportation, driven in part by micromobility strategies.

**Strategies that prioritized active modes.**
- Implement Vision Zero Speed Reductions
  Reduce speed limits to 25 mph on local roads within three miles of transit, in addition to reducing speeds on highways.
- Build a Micromobility Network
  Build nearly 10,000 miles of micromobility infrastructure, including protected lanes and trails.
- Invest in Free Short-Trip Service
  Fund shared personal mobility, including scooters and electric bikes, within 3 miles of transit.

**Other strategies that contributed to modal shift.**
- Suite of Growth Pattern Strategies
  By changing the growth pattern in Round 2 analysis, more households and jobs are in areas where the active transportation investments were focused.
- Apply Time-of-Day Tolls on All Freeways
  Toll vehicles on highways based on the time of day and the number of occupants in the vehicle.

**Active (walk & bike) mode share in 2015, and Futures round 1 and round 2 analysis**

- **Rising Tides, Falling Fortunes**
  - 2015: Up to 9%
  - 2050 Round 1: Up to 6%
  - 2050 Round 2: Up to 6%

- **Clean & Green**
  - 2015: Up to 9%
  - 2050 Round 1: Up to 10%
  - 2050 Round 2: 6%

- **Back to the Future**

Note that mode share is reflective of commute mode; the share is higher when accounting for all trips.
While still present, transit overcrowding was partially alleviated, with new Bus Rapid Transit (BRT) lines as well as a new Transbay Rail Crossing playing a key role.

**Final analysis of transit overcrowding still under development.**
Road pricing reduced roadway congestion, but equity concerns need to be addressed before advancing this strategy further. (part 1)

We were able to explore how congestion was affected by external forces & strategies.

The next slide will show the difference in Round 2.
Road pricing reduced roadway congestion, but equity concerns need to be addressed before advancing this strategy further. (part 2)

Apply Time-of-Day Tolls on All Freeways

Apply a $0.05 - $0.15 per mile toll on all freeways depending on vehicle occupancy and time of day.

**Rising Tides Falling Fortunes**
- 2050: 10% autonomous vehicle market share
- 2050: $0.20 per mile vehicle operating cost

**Clean and Green**
- 2050: 95% autonomous vehicle market share
- 2050: $0.40 per mile vehicle operating cost

**Back to the Future**
- 2050: 75% autonomous vehicle market share
- 2050: $0.10 per mile vehicle operating cost
Economic development strategies evaluated were insufficient to slow the decline of the middle class.

Create Incubator Programs

Expand and create new job incubator programs in economically-challenged communities.

Expand Construction Workforce Programs

Expand construction workforce development and training programs. Support early construction professionals in early apprenticeship years.

Share of regional jobs in middle wage industries - historic and projected

- Round 1
- Round 2
- Historic data

Share of Jobs in Middle Wage Industries

1990: 30%
2015: 20%
2050: 17%

19% (Round 2)
Adaptation and retrofit strategies boosted our region’s resilience.

Adapt to Sea Level Rise

Leverages existing and new revenues to fund a hybrid set of gray and green infrastructure systems to adapt the region.

Retrofit Older Existing Buildings

Provides 50% subsidies for older buildings built before current codes to support common earthquake, wildfire, energy, and water retrofit strategies.

Residential sea level rise impacts in Futures round 1 (without adaptation) and round 2 (with adaptation)

- Rising Tides, Falling Fortunes 3 feet of sea level rise
- Clean and Green 1 foot of sea level rise
- Back to the Future 2 feet of sea level rise

92%, 93%, and 96% of housing impacts are mitigated.
Urban growth boundaries led to minimal greenfield development in both Round 1 and Round 2.

**Maintain Urban Growth Boundaries**

Restrict urban development on greenfield lands, continuing the region’s recent commitment to reducing sprawl outward.

**Acres of greenfield development annually - historic and projected**
A VMT-based fee on office development was effective in focusing office growth, but not in shifting jobs to the East and North Bay.

Apply a VMT-Based Fee on Office Development

Apply a fee on new office development in areas that have high employment-related vehicle miles traveled (VMT), expanding upon a Plan Bay Area 2040 strategy.

Given that this strategy was included in Plan Bay Area 2040, it was studied in both Futures Round 1 and Futures Round 2 - and was very effective in focusing growth in low-VMT places in both analyses.

Further refinements could focus on better tailoring this strategy to reflect county-level conditions - rather than “one size fits all”.

Location of new office-related job growth relative to an area’s associated VMT level

Vehicle miles traveled (VMT) associated with an area
- High VMT
- Medium VMT
- Low VMT
- Very-Low VMT

Low and Very Low VMT areas account for 98%, 97%, and 94% of all office job growth.
A large tax package (to fund subsidies / projects) focused on higher-income individuals and businesses did not have significant adverse impacts on the economy.

**Raise New Revenues**

Place a balanced tax increase on businesses, parcels (building and home owners), and high-income earners.

</tr>
</tbody>
</table>

| **Not recommended to move forward unless major revisions are made.** | No housing strategies received this rating. |

- Already advancing into implementation due to state legislative action in 2019.
- Repurpose Public Land to Build Housing
- Increase Renter Protections
### Futures Round 2: Strategy Recommendations

#### Transportation

| Recommended to move forward into Plan Bay Area 2050 Blueprint. | **Operate and Maintain the Existing System** | **Advance a Complete Micromobility Network** | **Develop a Single Platform to Access and Pay for All Mobility** |
| Recommended to move forward with minor revisions. | **Advance a New Transbay Rail Crossing** | **Invest in Free Short-Trip Service** | **Implement Vision Zero Speed Reduction Measures** |
| Not recommended to move forward unless major revisions are made. | **Apply Time-of-Day Tolls on All Freeways** |

#### Ratings pending release of Draft Project Performance results.

- Provide Free Transit to Lower-Income Riders
- Make Strategic Transit Modernization/Expansion Investments
- Build a Next-Generation Bus Rapid Transit Network
- Build Carpool Lanes & Address Interchange Bottlenecks
- Advance Next-Generation Rail Modernization
- Extend the Regional Rail Network

Futures Final Report: Resilient and Equitable Strategies for the Bay Area’s Future

The full report will highlight the full suite of strategies studied and describes to what extent the region performs better with these strategies.

The report is expected to be posted on the MTC website later this month.
What’s Next?

Horizon provided an opportunity to “stress test” key strategies in advance of Plan Bay Area 2050. Input from elected officials, stakeholders, and the general public will help inform further refinements to make the shortlist of strategies included in the Plan Bay Area 2050 Draft Blueprint as resilient and equitable as possible.

The final decision on what strategies to include will occur in early 2020 and will be made by the MTC Commission and ABAG Executive Board.
Plan Bay Area 2050 Schedule
