

## What are the Sources of Final Blueprint Investments?

The Final Blueprint anticipates total inflation-adjusted revenues of nearly \$1.4 trillion across the four topic areas of transportation, housing, economy and environment during the plan period, from 2021 to 2050. Nearly \$603 billion is expected from existing funding sources, after accounting for impacts of the COVID-19 recession. The remaining \$780 billion is expected from a mix of new revenues, including per-mile freeway tolls, parking fees and other regional funding measures. These could reflect a mix of state, regional, and local sources – ranging from sales taxes to income taxes to property taxes – implemented in a phased manner over the coming decades.

## Who Benefits from Final Blueprint Investments?

Each Final Blueprint strategy was carefully crafted to advance equity, with an emphasis on channeling strategy-related investments toward households with low incomes (under \$45,000 per year) – roughly a quarter of all households. Investments in the housing and economy elements are directed almost exclusively toward households with low incomes, while transportation and environment investments are split between households with low incomes and other households.
